

ABOUT US

Using our knowledge and experience from the service equipment industry since 1999, we established our business in 2014 to produce high quality service equipment.

All processes from raw material production to finished products are carried out in our factory. Our main customer groups; schools, hospitals, restaurants, cafes, hotels and catering companies. And today, KOÇEL's products have become widely used in gastronomy and horeca fields at home and abroad.

The quality processes we have established in our factory are constantly inspected by international accredited organizations.

We meet customer needs with a wide product portfolio and constantly new product designs. The secret of our success is that we offer our high quality products to our customers on time and at affordable prices.

We love to serve you...

RIGHT TRAY SELECTION FOR YOUR COMPANY

SELECT RIGHT TRAY FOR YOUR COMPANY

Koçel is a company with qualified experience in offering the largest material, dimension, colour, shape and tailored made tray options in tray production in the food service industry. Product variety of Koçel is a key factor for selecting right trays for all requirements and budgets. Implement the following steps for selecting the most suitable tray for your company:

1- Step: Step For what purpose will tray be used?

Firstly, determine the correct intended use for selecting the correct tray. Serving Tray: It is used for carrying materials for serving purpose to the customers by the employees. Non-slip Surface and Rubytray Trays: They are used by the customers for carrying menu materials. Polyester trays: They are used in heavy duty conditions.

2nd Step: Who will use tray?

It is important to determine who will use the tray for identifying the suitable tray material. Children, Students, Soldiers, Office Workers, Service Personnel, Patients

3rd Step: How will tray be used and washed?

Consider how tray will be used and whether or not it will be resistant to medium level or heavy-duty use and adverse uses. Determine how many times trays will be washed in a day.

Intensive: They will be washed frequently, if needed.

Normal: They will be washed three times.

Minimal: They will be washed once a day.

4th Step: Determine budget per tray Ensure that correct tray is selected for correct use area. Selection of low-cost tray for intensive use area is not the most economical option. Tray prices vary according to the following factors: Production process, Material type and degree, Tray size Customization options, warranty period.

5th Step: Customization; Koçel performs high-quality customization works in its trays. Refer to relevant sections from catalogues.

6th Step: Additional Features to be Considered Consider the importance of the following features for selecting the best tray for your company. Stacking tabs - Place importance to air circulation for fast drying and excellent piling. Surface impact resistance, corner breakage resistance, scratch and dirt resistance, warranty period Technical testing descriptions: All Koçel trays are subject to a series of tests. You can see the methods of these tests in the next description. The results are shown on the technical test results section in product groups.

POLY

POLY trays are made of glass fiber reinforced polyester (ISO/NPG resin) for use in schools, hospitals, military facilities and areas where mass catering services are provided intensively.

The collection, which consists of high-edge, wide-profile and low-corner forms, is designed for diverse areas of use.

Thanks to its special formulation, its stain and heat resistance has been increased, and it is suitable for intensive washing in industrial dishwashers.

Thanks to the reinforced fiber array, it is resistant against breakage, rotation and impacts.

Stacking tabs ensure proper arrangement of trays and make drying easier through the air flow passing between them.

Designed for intensive food serving use, **POLY** is a cost-effective and aesthetic choice.

Its impact and flexibility resistance complies with the ISO 178-179 standards.

HORECA

They are laminated trays produced in different forms and sizes, for use in housekeeping service, catering organizations, bars and cafes.

They give aesthetic and decorative ambience in the areas of use thanks to their natural wooden patterns.

Thanks to their glossy surface, wiping and cleaning is much easier.

They are suitable for contact with food through their specially-coated surface technique.

They have high scratch and abrasion resistance as well as resistance against stains and chemicals.

Dishwasher-safe.

POLY PERSONALIZED

CORK

They are cork-coated laminated trays with glossy surface made by using decorative patterns.

They are easy to use in areas such as cafes, restaurants, hotels etc. thanks to the non-slip characteristic provided by the cork surface.

Not dishwasher-safe.

They are resistant against breakage and impacts.

Natural cork is used.

CERTIFICATES

FAIRS WE ATTEND

THERMAL SHOCK RESISTANCE TEST

The test consists of the method of measuring short-term radical heat change and application and deformation by taking the tray from iced water (0°C) and putting in boiling water (100°C).

BRACKING RESISTANCE TEST

It consists of measuring deformation by throwing a metal ball from a particular height on the tray.

SCRATCH RESISTANCE TEST

Scratch and wear occurred as a result of friction between the porcelain plate and tray surface are observed. The test consists of measuring any wear on the surface and from left to right movement of a porcelain container with hand pressure to be placed on tray regarding the movement on the tray surface.

	MINIMAL	NORMAL	EXTENSIVE
WASHING FREQUENCY	ONE WASHING PER DAY	3 TIMES PER DAY	WASH AS OFTEN AND AS FREQUENTLY AS NEEDED.

Water type : Soft, non-calcareous.

Detergent : Chlorinated alkaline detergent.

Note : If you are using Thermo-Disinfection chemicals, please contact us.

RECOMMENDED DETERGENTS

(*) LC = Chlorine-rich detergent (6% active chlorine)

LA = Alkaline detergent (10-20% caustic soda + scale remover)

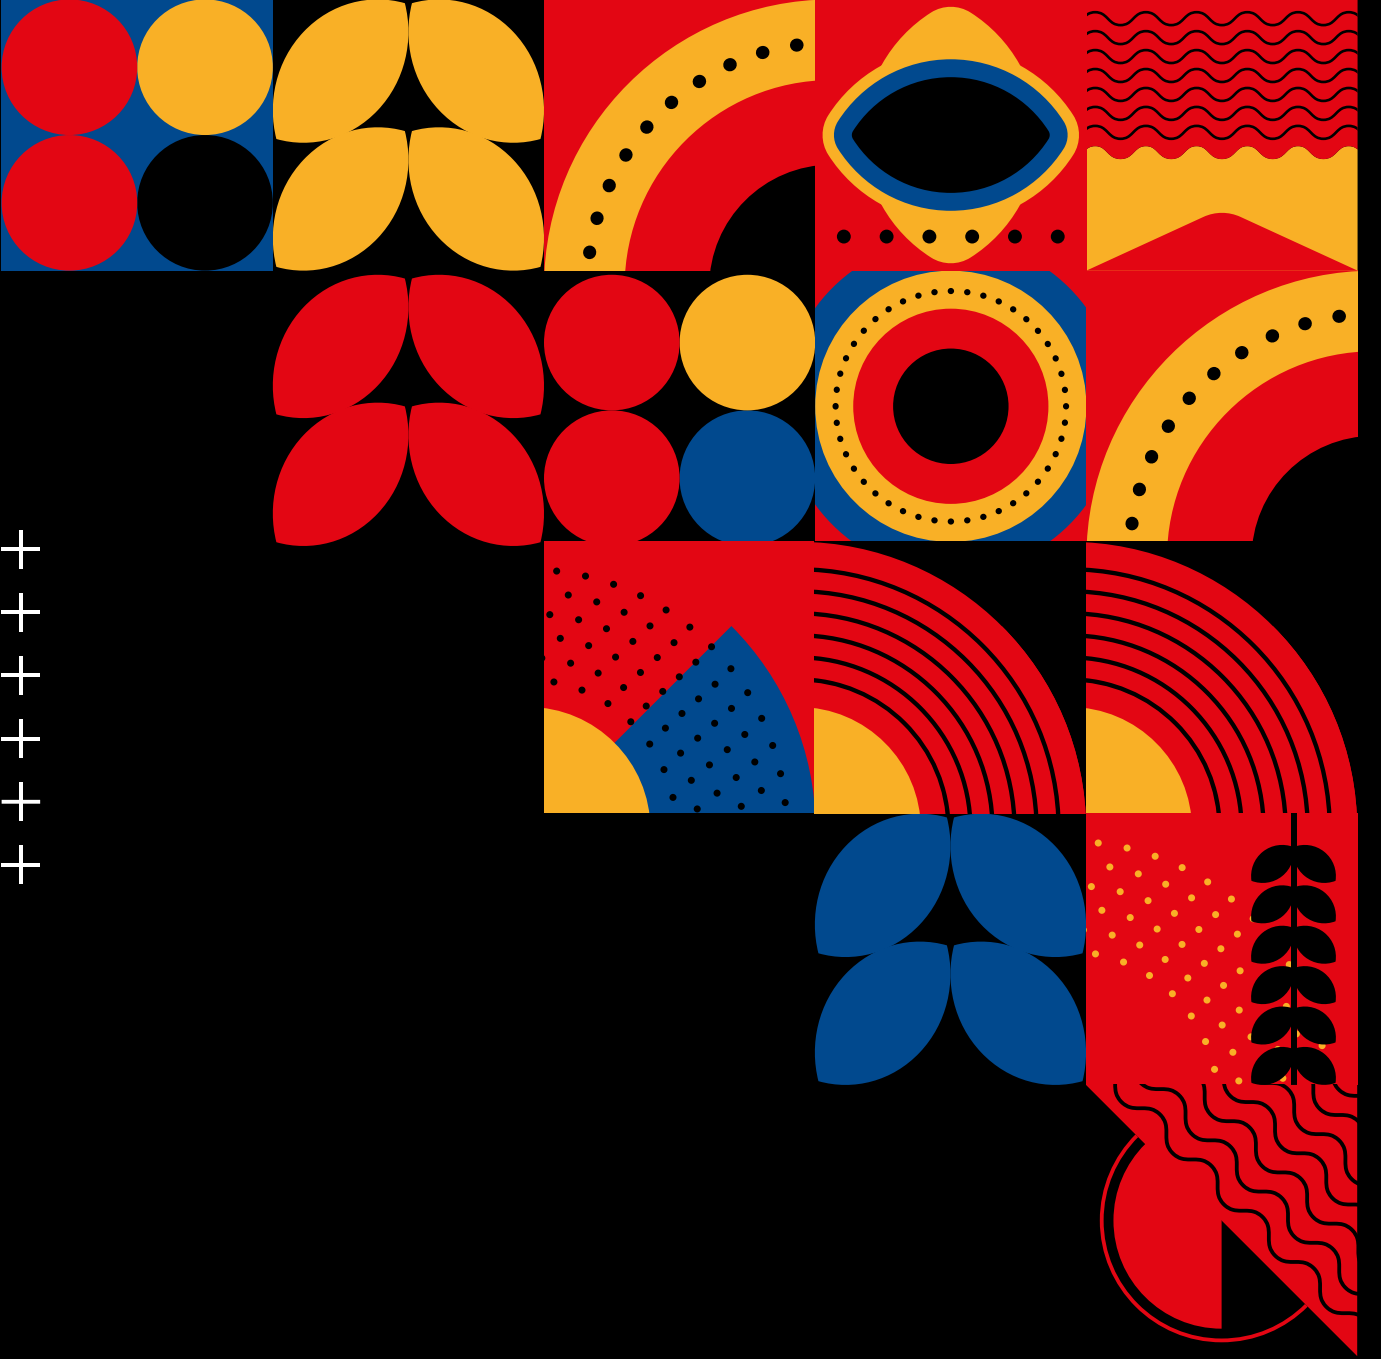

Trump Hydro (Ecolab)
